

Web Design

Quiz Lab test

Create a basic e-commerce website using HTML that contains three pages with the following requirements:

- **Page1 (home.html):**
 - Include a main heading with the **store name** (e.g., "My Online Store").
 - Add navigation links to **Home, Product Catalog and Contact Us** using anchor tags.
 - Create an unordered list of at least 5 product categories (e.g., Electronics, Clothing, Accessories).
- **Page2 (product.html):**
 - *Include header and navigation in this page also.*
 - Add a table with the columns: Product Name, Price, Quantity, Category, Product Photo.
 - Populate the table with at least 5 products (e.g., Laptop, T-shirt, Headphones).
- **Page 3 (contact.html):**
 - *Include header and navigation in this page also.*
 - Create a contact form with the following fields: Name, email, Message, Gender, Product of Interest (dropdown), submit button

Page 1:

My Online Store

[Home](#) | [Product Catalog](#) | [Contact Us](#)

Product Categories

- Electronics
- Clothing
